

## The event

The STORENERGY congress will show ways to use resources efficiently on **November 17 + 18, 2021**. For 2021, we have also decided to arrange the STORENERGY congress digitally in order to be able to offer planning security to all participants.

Nevertheless, speakers and visitors will have the opportunity to exchange ideas among themselves in various ways

## Four themes with a focus on H2 this year

The main themes of this year's STORENERGY congress are solutions for flexibilization in the energy system. In addition to energy storage, the focus is on solutions for integrating hydrogen into the energy supply.

The "Call for Papers" invites you to submit papers for the following four thematic fields:

**1. Focus H2 -hydrogen**

Technologies, concepts, economic and ecological challenges and current developments.

**2. Cross-sector energy storage concepts**

Solutions, field reports, model plants in the areas of P2X or V2G

**3. Batteries and thermal storage**

Current research & best practice

**4. Economy, politics & society**

Business models, future storage from the perspective of the energy industry, current development of the storage market, social implications (e.g. acceptance), sustainability aspects of energy storage and sector coupling.

## **Abstracts and selection of presentations**

The selection of the presentations will be made by the advisory committee of the STORENERGY congress. You still want to submit a presentation? Please contact us in advance.

## **The abstract should include the following information:**

- Title (or tentative working title).
- Speaker, organization or company, contact information
- Short description
- Has the presentation already been given? If yes, at which event.

## **Presentation details**

A congress presentation will take 20 minutes, followed by a 5-minute Q&A session.  
Congress language is German or English

## **Entrance to the event**

Of course, all speakers will receive free entrance to the congress for both days of the presentation.
